The bug out bag checklist

Work through it category by category. Print the page to tick items off as you pack.

WATER

- [ ] Water bottles or a hydration bladder, 2 to 3 liters per person
- [ ] A way to make water safe: a portable filter plus purification tablets, or plain unscented bleach and a dropper
- [ ] A collapsible water container for collecting and treating water

FOOD

- [ ] Three days of food that needs no cooking: energy or protein bars, nut butter packets, jerky, dried fruit, nuts, ready-to-eat meals
- [ ] A manual can opener if you pack any cans, and a spoon
- [ ] Food for special diets, babies and pets

SHELTER AND WARMTH

- [ ] An emergency blanket or bivy sack
- [ ] A rain poncho or rain jacket
- [ ] A warm layer and a hat, even in summer
- [ ] A sleeping bag or warm blanket if you can carry it
- [ ] Work gloves

LIGHT, POWER AND COMMUNICATION

- [ ] A flashlight or headlamp, plus extra batteries
- [ ] A battery-powered or hand-crank radio, ideally a NOAA Weather Radio
- [ ] A whistle to signal for help
- [ ] A phone charging cable and a charged power bank
- [ ] A written list of phone numbers and a paper map of your area

FIRST AID AND HEALTH

- [ ] A first-aid kit: bandages, gauze, tape, antiseptic wipes, gloves, and a tourniquet if you know how to use one
- [ ] Prescription medicines, with a written list of names and doses
- [ ] Over-the-counter basics: pain reliever, antihistamine, anti-diarrhea medicine
- [ ] Glasses or contact lenses and solution
- [ ] N95 or dust masks
- [ ] Hand sanitizer and moist towelettes

TOOLS

- [ ] A multi-tool or knife
- [ ] Matches in a waterproof container and a lighter
- [ ] Duct tape and a length of cord
- [ ] A wrench or pliers to turn off utilities

DOCUMENTS AND MONEY

- [ ] Copies of IDs, insurance policies and prescriptions in a waterproof bag
- [ ] Cash in small bills
- [ ] Emergency contacts, including someone out of town

CLOTHING AND HYGIENE

- [ ] A complete change of clothes and sturdy shoes
- [ ] Extra socks
- [ ] Toilet paper, garbage bags and plastic ties for sanitation
- [ ] Toothbrush, soap and feminine supplies

FOR THE PEOPLE AND PETS WHO DEPEND ON YOU

- [ ] Babies: formula, bottles, diapers, wipes
- [ ] Older adults: hearing aid batteries, mobility aids, extra glasses
- [ ] Pets: food, water, leash or carrier, and vaccination records

How much water and food to pack

FEMA and the CDC both plan around one gallon of water per person per day, for drinking and basic hygiene. For 72 hours that's three gallons each, about 25 pounds, which is too heavy for most people to carry far. That's why a bug out bag carries a few liters and the means to treat more.

Supply	Per person	How to carry it
Water	1 gallon a day (3 gallons for 72 hours)	2 to 3 liters in the bag, the rest treated on the way or kept in the car
Food	3 days	Calorie-dense, no-cook food. Food labels use 2,000 calories a day as a reference.
Medicines	Enough to last until you can reach a pharmacy	In original bottles, with a written list of doses

To treat water on the move, a rolling boil for one minute is the most reliable method. Without a stove, use bleach: the EPA's dose is 8 drops of 6% unscented bleach per gallon (6 drops of 8.25% bleach), doubled for cloudy water, then a 30-minute wait. Our guide to making water safe to drink has the full table.
